Wisconsin State Statute 36.25(46) requires that all students who will be residing in a campus residence hall receive yearly information regarding the risks associated with Hepatitis B and Meningococcal disease and the effectiveness of the vaccines available to prevent these diseases. The student who resides in campus housing must affirm whether he or she has received vaccinations against Hepatitis B and/or Meningococcal disease, and must provide the dates of the vaccinations, if any. The parents of minor students must provide this information. Please have these dates available when you check into housing.

Lawrence University requires that the Hepatitis B vaccine be initiated as a condition for enrollment. Immunization for Meningitis is strongly encouraged. Both vaccines are available on campus at the Landis Health Center, but it is recommended that students receive them prior to coming to campus.
